

Release notes - Testing INT Caymanas 26/08/2022

Updates carried out from feedback, general maintenance and Go- Live preparation 26 Aug 2022

Author: @ Justin Anthony

Capped Return on Tickets

Request from Aswanda (Caymanas) - **Feature Request #2 and #2.1**

We have implemented the following at preliminary stage for testing and validation within the INT environment

The following configuration items have been introduced

The settings are hardcoded for the time being, please lodge a support request if you would like these changed support-4x3@betmakers.com

Config	Type & Current Setting	Functionality
masterBranch	Type: String Setting: CaymanasPark Use Camel Case	- A name is set which determines the Master Branch of which the tickets can be redeemed - only branches with the matching branch name can redeem these tickets - Also instructs the customer on the ticket which branch to go to - Only 1 master branch can be set
branchCap	Type: Number Setting: 500000	- This is the cap of which a potential return amount cannot exceed at payout - Warning: Cap must always be set - DO NOT SET TO 0 (zero)
branchCapEnabled	Type: Boolean Setting: True	Override setting used to disabled & enable the entire Cap feature, when set to false tickets can be redeemed anywhere

Examples

Ticket not exceeding cap	Ticket when payout exceeds cap
--------------------------	--------------------------------

CAYMANAS PARK
MEMBER OF THE SUPREME VENTURES GROUP

1251-3897-934-4

Gold Coast - Race 2
